

TEJASA REETHI SUDARSI

+91-9581022529 — reethi.ranga10@gmail.com

B.Tech in Cyber Security — LinkedIn — GitHub

Summary

Cyber Security undergraduate with strong foundations in Python, JavaScript, Linux, Computer Networks, Operating Systems and Data Structures & Algorithms. Experienced in developing security automation tools, interactive web applications and network monitoring solutions. Passionate about secure software engineering, cybersecurity and building scalable applications.

Education

Sri Venkateswara College Of Engineering	2023–2027
B.Tech in Cyber Security	CGPA: 8.54/10
Bhashyam Junior College	2020–2022
Board of Intermediate Education, Andhra Pradesh	Marks: 773/1000
Bhashyam High School	2019–2020
Board of Secondary Education, Andhra Pradesh	CGPA: 10/10

Technical Skills

Programming Languages: Python, JavaScript, C, SQL

Cyber Security: Linux Security, Network Security, Authentication Security, Cryptography, Threat Detection

Web Technologies: HTML, CSS, JavaScript

AI Engineering & Data Science: Machine Learning Fundamentals, Data Analysis, NumPy, Pandas, Jupyter Notebook

Core Computer Science: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming

Tools & Platforms: Linux, Git, GitHub, Scapy, iptables

Projects

2D to 3D Box Converter *JavaScript, HTML, CSS*

- Developed a web application that converts a 2D box representation into an interactive 3D visualization using JavaScript.
- Implemented geometric transformations and coordinate calculations to generate a 3D model from 2D input.
- Designed an interactive interface for real-time visualization and manipulation of the generated 3D object.
- Applied computer graphics and mathematical transformation concepts to improve rendering accuracy.

Self-Healing Linux Firewall *Python, Linux, iptables*

- Developed an automated Linux firewall that continuously monitored authentication logs.
- Detected brute-force SSH login attempts by analysing repeated authentication failures.
- Automatically blocked malicious IP addresses using iptables rules to strengthen server security.

Network Privacy Monitor *Python, Scapy*

- Developed a packet analysis tool using Scapy to monitor network traffic in real time.
- Inspected network packets to identify sensitive information transmitted over insecure protocols.
- Logged suspicious traffic patterns and demonstrated risks associated with unencrypted communications.

Achievements

- Earned Ethical Hacking Certification from Udemy.
- Completed Python with Data Structures and Algorithms Certification.
- Participated in DeepTech DSA Bootcamp focused on algorithmic problem-solving.
- Maintained a CGPA of 8.54/10.

Leadership & Extracurricular Activities

Cyber and Information Security Association (CISA) – Technical Team Member

- Organized cybersecurity workshops, technical quizzes and awareness sessions.
- Assisted in conducting technical events and promoting cybersecurity best practices.
- Mentored junior students on cybersecurity fundamentals and security tools.
